3. CONVERSION GOALS & VALUE MAPPING

Conversion Action	Goal Type	Bidding Optimization	Estimated Value	Tracking Method
Perplexity Pro Subscription	Purchase / Revenue	Primary (Maximize Value)	\$20.00 (Monthly)	Google Ads Tag via GA4
Education Plan Signup	Purchase / Lead	Primary (Maximize Conversions)	\$10.00	Firebase / Web Webhook
Account Sign-Up (Free Tier)	User Growth	Secondary (Observation)	\$1.00	Google Ads Tag / GA4
App Download (iOS/Android)	Mobile Growth	Secondary (Observation)	\$2.50	Firebase SDK Link

4. GA4 CUSTOM EVENT FRAMEWORK

Event Name: page_view Trigger: User lands on home page or /pro landing pages. Parameters: page_location, page_referrer
Event Name: sign_up Trigger: User successfully creates a free account via Google, Apple, or Email. Parameters: method (e.g., "google", "email")
Event Name: begin_checkout Trigger: User clicks "Upgrade to Pro" and opens Stripe payment module. Parameters: value (20.00), currency ("USD")
Event Name: purchase Trigger: User successfully completes Stripe payment and sees receipt. Parameters: transaction_id, value (20.00), currency ("USD")

5. CONVERSION FUNNEL DROP-OFF MATRIX

Stage Transition	Metric Action	The Drop-Off / Friction Point Explained
Impressions → Clicks	~8% <i>CTR</i>	92% Core Drop-off: Potential mismatch between search intent and ad headlines, or low ad-rank visibility.
Clicks → Active Users	~30% <i>Bounce Rate</i>	30% Immediate Loss: Traffic lands but leaves without interacting. Indicates slow page-load speeds or weak visual hooks.
Active Users → Sign-Ups	~15% <i>Conversion</i>	85% Friction Loss: Users test the AI tool but choose not to save their history. Sign-up flow might feel too forced or premature.
Sign-Ups → Paid Pro Subs	~5% <i>Upgrade Rate</i>	95% Monetization Gap: Users find value in the free tier but don't see enough urgency or premium differentiation to pay \$20/mo.

6. PERFORMANCE OPTIMIZATION PLAN

Trimming Keyword Waste

Identify keywords with high spend but zero conversions over a 30-day window. Pause them or transition them to exact match types to preserve budget.

Aggressive Scaling

Identify keywords maintaining a CPA lower than our target (<\$15). Increase their max-CPC caps or allocate more daily budget to capture additional impression share.

Creative Iteration

Replace the lowest-performing headlines and descriptions highlighted by Google's asset health report with fresh, benefit-focused variations.

Landing Page Conversion Optimization

If an ad has a high CTR but a low conversion rate on the site, run user testing and A/B tests on the landing page to minimize traffic leakage.
