

# Perplexity AI Search

## GOOGLE ADS CAMPAIGN STRUCTURE ARCHITECTURE

### CAMPAIGN STRUCTURE OVERVIEW

A meticulously structured Google Ads hierarchy built to channel search traffic accurately based on user intent. This architecture segregates brand advocates, functional search queries, commercial tier intent, and competitor intercepts to maximize Quality Score and yield lower Cost-Per-Acquisitions (CPAs).

### CAMPAIGN & AD GROUP MAPPING

| Campaign Name          | Ad Group Name            | Target Landing Page                                                                       | Objective Focus             |
|------------------------|--------------------------|-------------------------------------------------------------------------------------------|-----------------------------|
| 1. Brand Campaign      | Brand - Core             | <a href="https://www.perplexity.ai">https://www.perplexity.ai</a>                         | Defensive Brand Search      |
| 1. Brand Campaign      | Brand - Login            | <a href="https://www.perplexity.ai/?login=true">https://www.perplexity.ai/?login=true</a> | User Access Retention       |
| 2. Product Campaign    | Product AI Search        | <a href="https://www.perplexity.ai">https://www.perplexity.ai</a>                         | High-intent Generic Traffic |
| 2. Product Campaign    | Product - Deep Research  | <a href="https://www.perplexity.ai/pro">https://www.perplexity.ai/pro</a>                 | Pro Feature Interest        |
| 3. Pricing Campaign    | Pricing - Perplexity Pro | <a href="https://www.perplexity.ai/pro">https://www.perplexity.ai/pro</a>                 | Commercial Upgrade Intent   |
| 4. Competitor Campaign | Competitor - ChatGPT Alt | <a href="https://www.perplexity.ai/pro">https://www.perplexity.ai/pro</a>                 | Conquest Market Intercept   |

### KEYWORD TARGETING & MATCH TYPE ASSIGNMENT

| BRAND CAMPAIGN KEYWORDS |              |                                     |
|-------------------------|--------------|-------------------------------------|
| Target Keyword          | Match Type   | Google Ads Syntax                   |
| perplexity ai           | Exact Match  | <code>[perplexity ai]</code>        |
| perplexity              | Exact Match  | <code>[perplexity]</code>           |
| perplexity ai search    | Phrase Match | <code>"perplexity ai search"</code> |
| perplexity login        | Exact Match  | <code>[perplexity login]</code>     |
| perplexity sign in      | Exact Match  | <code>[perplexity sign in]</code>   |

| PRODUCT & PRICING CAMPAIGN KEYWORDS |              |                                 |
|-------------------------------------|--------------|---------------------------------|
| Target Keyword                      | Match Type   | Google Ads Syntax               |
| ai search engine                    | Phrase Match | "ai search engine"              |
| ai search engine with sources       | Exact Match  | [ai search engine with sources] |
| perplexity pro                      | Exact Match  | [perplexity pro]                |
| perplexity premium                  | Phrase Match | "perplexity premium"            |
| perplexity pricing                  | Exact Match  | [perplexity pricing]            |
| perplexity pro price                | Phrase Match | "perplexity pro price"          |

| COMPETITOR CAMPAIGN KEYWORDS |              |                         |
|------------------------------|--------------|-------------------------|
| Target Keyword               | Match Type   | Google Ads Syntax       |
| chatgpt alternative          | Phrase Match | "chatgpt alternative"   |
| chatgpt vs perplexity        | Exact Match  | [chatgpt vs perplexity] |
| claude alternative           | Phrase Match | "claude alternative"    |

## NEGATIVE KEYWORD STRATEGY

The following account-level negative keywords are systematically implemented to filter out low-value search queries, preventing wasted ad spend on job-seeking traffic, unauthorized file distribution, and non-commercial users.

|                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                             |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Non-Commercial &amp; Cracked Negatives</b></p> <ul style="list-style-type: none"> <li>• [cracked]</li> <li>• [torrent]</li> <li>• [apk]</li> <li>• [mod]</li> <li>• "free premium download"</li> <li>• "perplexity bypass"</li> </ul> | <p><b>HR, Employment &amp; Admin Negatives</b></p> <ul style="list-style-type: none"> <li>• [jobs]</li> <li>• [internship]</li> <li>• [careers]</li> <li>• "perplexity customer service"</li> <li>• "perplexity office location"</li> </ul> |

## CAMPAIGN STRUCTURE INTEGRITY CHECKLIST

### Symmetric Landing Page Alignment

Users seeking "Login" are strictly diverted to the prompt login module interface to minimize frictional bounces. Generic informational queries bypass the payment screens directly to the active query bar page.

### No Match-Type Overlap

Exact match keywords are segmented or highly bid-optimized to avoid internal bidding wars against broader phrase variations in concurrent ad groups.

### Proactive Negative Filtering

Regular reviews of the Search Terms Report (STR) are pre-scheduled to immediately identify and add emerging informational search terms as negative matches.
